EDUCATION

Jeonbuk National University, Korea

Mar. 2026–Present

M.S. in Division of Electronic and Information Engineering (advisor: Prof. Sang Jun Lee)

Jeonbuk National University, Korea

Mar. 2022–Feb. 2026

B.S. in Division of Electronic Engineering

RESEARCH INTERESTS

My research focuses on medical image analysis, with particular emphasis on deep learning-based analysis of panoramic X-ray images for dental and maxillofacial applications. I develop attention-based architectures and knowledge distillation techniques to improve the robustness and clinical applicability of segmentation models in panoramic radiography. My long-term research interest also includes camera-based remote photoplethysmography (rPPG) for non-contact physiological signal estimation and its clinical applications.

HONORS AND AWARDS

Excellence Award, Mentoring Program

2025

Jeonbuk National University

Outstanding Intern, Big Data Innovation Convergence College

2024

Seoul National University

Merit Award, Artificial Intelligence Online Competition

2024

Jeonbuk National University

Grand Prize, National Contest of Champions

2024

Seoul National University

Merit Award, AWS DeepRacer Competition

2024

Jeonbuk National University

President’s Award, Startup Idea Challenge for Social Big Data Analysis

2023

University of Seoul

Excellence Award, Smart Device Idea Contest

2023

Jeonbuk National University

Bronze Prize, TBM Startup Camp

2023

Jeonbuk National University

CERTIFICATIONS

AI-900: Microsoft Azure AI Fundamentals

2023

Microsoft

Credential ID: GTcD-4wBm
